No ugly spiral lines

Fast-Tube™ eliminates the ugly spiral lines obtained with cardboard column forms.
**ADVANTAGES**

The all-weather utility column form that comes on a 100’ flattened roll.
Cut to length, sandwich alignment tab between two 2x4s, install rebar, brace and pour.

---

**Compact Light weight**

On the left are 100’ of 10” diameter cardboard tubes. On the right is a 100’ roll of Fast-Tube™, the size of a brief case.

Fast-Tube™ occupies 1% the space and weighs 10% compared to cardboard.

---

**No Waste**

Cut Fast-Tube™ to length with a utility knife from the 100’ roll - no waste.
Cardboard comes in a fixed length. Once cut, the remainder is discarded.

---

**Strip in Seconds**

Pull on the alignment tab, Fast-Tube™ strips in seconds. Polyethylene does not bond to concrete.
Cardboard sticks to concrete and is slow and difficult to strip.

---

**Undamaged by moisture**

Cardboard soaks up water like a sponge leading to form failure.
Fast-Tube™ is made of high strength polyethylene and can be exposed to moisture indefinitely.

---

Fast-Tube™ - the contractor’s column form
